Attractive valuations bode well for the stock market

Economy: The recovery in Pakistan's economy has gained further traction. Led by the robust growth in manufacturing sector and uninterrupted activity in the services sector, we anticipate GDP growth of 4.3% in FY22. The rebound in economic activity is also corroborated by the strength of a variety of demand indicators such as power consumption, cement dispatches, automobile sales volume, and sales of retail fuel. However, this strong recovery in domestic demand, coupled with spike in global commodity prices, have led to a large import bill and a hefty Current Account Deficit (CAD). More specifically, Current Account Deficit (CAD) widened to USD 1.5 billion in August 2021 after clocking in at USD 800 million in the previous month. Unlike the past episodes, this time around the central bank appears inclined to better manage the mounting pressure on the Balance of Payment (BoP), emanating from widening CAD. Instead of fixation on the fixed exchange rate, the SBP has let the PKR reflect its fundamental value with more than 10% devaluation of the Pak Rupee versus US Dollar since May 2021. In addition to this, considering the pace of economic recovery, the SBP in its meeting held on September 20th, 2021 decided to raise the Policy Rate by 25 basis points to 7.25%. Based on the economic growth trajectory and higher commodity prices, we anticipate the CAD to widen to USD 9.5 billion (3% of GDP) in FY22. Despite external account pressures, the SBP's FX reserves stand at USD 19.5 billion helped by the receipt of USD 2.7 billion from the IMF on account of SDR allocation and a cumulative inflow of USD 2.2 billion in the Roshan Digital Account (RDA).

On fiscal operation, according to revenue board, Federal Board of Revenue (FBR) has collected Rs. 1,391 billion during July-September 2021 against the target of Rs. 1,211 billion, reflecting a massive 38% growth in FBR's tax collection on a year-on-year basis. This remarkable performance shows that the FBR is well on its way to achieve the ambitious tax collection target of Rs. 5,829 billion for FY22. On Covid-19 front, the strategy of smart & targeted lockdowns has worked well as infection ratio in the country has fallen below 3% and active cases have dropped to around 48,000. The vaccination drive has picked-up pace as 81.6 million doses have been administered so far. Considering the recent progress, majority of population is expected to get inoculated in the next couple of months that would mitigate the risk of any significant disruption to the economic activity going forward.

Regarding the status of USD 6 billion Extended Fund Facility (EFF) programme with the International Monetary Fund (IMF), Finance Minister Shaukat Tarin on Monday assured the IMF of Pakistan's commitment to successfully completing the upcoming review as well as Article IV consultations. Negotiations with the IMF for the sixth review of the EFF along with Article IV consultations will begin on October 4th 2021. The large currency devaluation under flexible exchange rate regime, beginning of monetary tightening cycle with a token 25 bps hike in the Policy Rate by the SBP, and recent increase in PDL ahead of negotiation shows the intent of the government for resumption of stalled IMF programme.

Stock Market: During the last few weeks, the stock market has been under severe selling pressure. Despite attractive market fundamentals, during CY21 through September 30th, the benchmark KMI 30 Index has delivered a modest 2% return. What has caused this lackluster market performance? Investors were unnerved by the developments in the neighboring Afghanistan with the hasty withdrawal of US forces; ensuing fall of the Afghan government and takeover of Kabul by Afghan Taliban. On the Balance of Payment (BoP) position, investors also seemed worried about the widening of Current Account Deficit (CAD) that clocked-in at USD 1.5 billion in August 2021 and USD 800 million in the previous month. Furthermore, the recent devaluation of the PKR versus US dollar coupled with rising industrial raw material and energy prices have ignited concerns on the corporate profitability outlook. In a bid to contain the consumption led demand pressure, the SBP's decision to raise the Policy Rate by 0.25% in its MPC meeting held on September 20th, 2021 was also not well received by the market. According to the market talks, leveraged positions of retail investors, who received margin calls after continuous decline in certain shares accelerated the sell-off of equities during the week ending September 24th 2021.

What lies ahead for the stock market? As we see it, stock market levels are attractive entry points for investors with medium to long-term investment horizon. In our view, the market is well positioned to deliver decent double digit returns in FY22, and beyond driven by: (i) attractive market valuations as captured in the extremely attractive Price-to-Earnings (P/E) multiple of 5.9x; (ii) robust economic activity; (iii) easier financial conditions; (iv) healthy corporate profitability; and (v) abundant market liquidity.

On the economic front, the recent currency devaluation is unlikely to derail the ongoing growth momentum. More importantly, with respect to corporate profitability, due to resilient consumer demand, companies are gradually passing on the increasing input costs to maintain profit margins. In addition to this, many Index heavy sectors such as Oil & Gas Exploration, Textile Composite, and Technology & Communication are net beneficiary of currency devaluation, and other sectors such as Commercial Banks and IPPs are currency neutral. With respect to the external account, unlike the past episodes, this time around the central bank seems prepared to better manage the pressure on the Balance of Payment using exchange rate as first line of defense. Furthermore, to curb imports of luxury items, the SBP has imposed 100% cash margin requirement and the government has levied regulatory duties on non-essential imported items.

While there are some challenges, especially with respect to Pak-US relations and recognition of Taliban government by international powers; the developments in Afghanistan also offer tremendous economic opportunities for the country that can be reaped by focusing on regional connectivity, and by building long-planned trade and energy routes from Pakistan to Central Asian states.

From the fundamental perspective, the recent indiscriminate sell-off of equities has sent market valuations to the equivalent of economic crisis eras. More specifically, currently, the market is trading at an attractive forward Price-to-Earnings (P/E) multiple of 5.9x, versus 10-year average of 8.3x. On a relative basis, 16.9% Earnings Yield offered by the market coupled with a healthy 5.7% dividend yield looks appealing compared with 10-year PIB yield of 10.5%. PSX's valuation discount to MSCI EM (Asia) has grown to over 60% compared to its historical average discount of 40%. With respect to the Policy Rate, the SBP cited that "looking ahead, in the absence of unforeseen circumstances, the MPC expects monetary policy to remain accommodative in the near term, with possible further gradual tapering of stimulus."

The Bottom Line: In our view, stock market would take direction from the development on the resumption of the IMF programme. Given a strong investment case for the stock market, we advise investors with medium to long-term horizon to build position in the stock market through our NBP stock funds. Our funds have a long-term track record of outperforming the stock market by a good margin.

Stock Market Review

During September 2021, severe selling pressure was witnessed at the local bourse as the benchmark KMI 30 Index lost 5,326 points (a hefty decline of 6.9%) on a month-on-month basis. In our view, this lackluster market performance is mainly attributable to the following key factors: concerns on the corporate profitability after a sharp currency devaluation & steep surge in global commodity prices; worries over the Balance of Payment (BoP) position after a large Current Account Deficit (CAD) of USD 1.5 billion in August 2021 and USD 800 million in July 2021; the developments in the neighboring Afghanistan, Pak-US relations and recognition of Taliban government by international powers. In addition to this, according to the market talks, leveraged positions of retail investors, who received margin calls after continuous decline in the Index accelerated the sell-off of equities during the week ending September 24th 2021.

During the month, Chemicals, Commercial Banks, Fertilizer, Food & Personal Care Product, Power Generation & Distribution, Textile Composite, and Technology sectors performed better than the market. On the contrary, Automobile Parts & Accessories, Automobile Assembler, Cements, Engineering, Oil & Gas Marketing Companies, Paper & Board, and Refinery sectors lagged behind. On participant-wise activity during the month, Foreigners stood as the largest sellers in the market, liquidating their equity holdings to the tune of USD 45 million. Alongside, Mutual Funds and Broker Proprietary Trading were other main sellers, offloading shares worth USD 15 million and USD 10 million, respectively. On the contrary, Individuals stood as the largest buyers, adding their equity positions by USD 29 million. Likewise, Banks / DFI, Insurance Companies, and Other Organization emerged as other major buyers, accumulating shares worth USD 17 million, USD 16 million, and USD 15 million, respectively.

Looking ahead, we reiterate our sanguine view on the stock market driven by: attractive market valuations; robust economic activity; easier financial conditions; and abundant market liquidity. On the economic front, the recent currency devaluation is unlikely to derail the ongoing growth momentum. Due to strong consumer demand, companies are gradually passing on the increasing input costs to maintain profit margins. In addition to this, many Index heavy sectors such as Oil & Gas Exploration, Textile Composite, and Technology & Communication are net beneficiary of currency devaluation and other sectors such as Commercial Banks and IPPs are currency neutral. The central bank looks set to navigate pressure on the Balance of Payment through a flexible exchange rate policy as manifested by over 10% devaluation of the PKR since May-21. Furthermore, to curb imports of luxury items, the SBP has broadened the scope of 100% cash margin requirement on import of another 100+ items and the government has levied regulatory duties on non-essential imported items.

From the fundamental standpoint, the market is trading at an attractive forward Price-to-Earnings (P/E) multiple of 5.9x, versus 10-year average of 8.3x. The market also offers a healthy 5.7% dividend yield. Given a strong investment case for the stock market, we advise investors with medium to long-term horizon to resist the temptation to exit the market at these levels and consider this market weakness as a buying opportunity.

Money Market Review

Driven by sharp spike in prices of food component, inflation as measured by the CPI inflation clocked-in at 9% for September 2021, exceeding market consensus. In its recent bi-monthly monetary policy review on September 20th, the SBP decided to increase the Policy Rate by 25 bps to 7.25%. The MPC cited that "looking ahead, in the absence of unforeseen circumstances, the MPC expects monetary policy to remain accommodative in the near term, with possible further gradual tapering of stimulus." We anticipate a modest 100 bps hike in Policy Rate during FY22.

During the outgoing month, the SBP held two T-Bill auctions with a target of Rs. 1,350 billion against the maturity of Rs. 1,499 billion. In the first T-Bill auction, an amount of Rs. 355 billion was accepted at a cut-off yield of 7.23%, 7.49% and 7.60% for 3-month, 6-month and 12-month tenures. In the second T-Bill auction, an amount of Rs. 791 billion was accepted at a cut-off yield of 7.64% and 7.98% for 3-month and 6-month tenures whereas bids for 12-month tenures were rejected. In the PIB auction, bids worth Rs. 98 billion were realized for 3-year, 5-year, 10-year and 15-year tenures at a cut-off yield of 8.88%, 9.18%, 9.83% and 10.40%, respectively whereas no bids were received for 20-year and 30-year tenures.

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and will remain alert to any developments that may influence our investment strategy.

NBP Funds launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 15.1% p.a versus Benchmark return of 7.8% p.a. The current exposure in Income Fund and Equity Fund stands at 22.2% & 70.7%, respectively. The Plan can invest up to 100% in equity funds. During the month of August 2021, provisioning against Sindh Workers' Welfare Fund by NBP ACTIVE ALLOCATION RIBA FREE SAVINGS FUND amounting to Rs. 5.38 million has been reversed on the clarification received by Sindh Revenue Board vide letter No. SRB/TP/70/2013/8772 dated August 12, 2021 addressed to Mutual Funds Association of Pakistan. This reversal of provision has contributed towards an unusual increase in NAV of the NBP ACTIVE ALLOCATION RIBA FREE SAVINGS FUND by 6.07% on August 13, 2021. This is one-off event and is not likely to be repeated in the future.

Investment Objective
To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah Compliant bank deposits and money market/debt securities.

Fund Manager Commentary
During the month, the Fund generated an annualized return of 4.6% p.a. against the Benchmark return of 3.2% p.a. Since its launch in January 2016, the Fund offered an annualized return of 7.0% p.a. against the Benchmark return of 3.9% p.a., hence an out-performance of 3.1% p.a. This out-performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high-quality credit profile. The Fund is allowed to invest in Shariah Compliant Government Securities of maturity up to 3 years as well as Shariah Compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 99% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.
